Mr Lester Snow  
CalFed Executive Director  
Sacramento

Dear Mr. Snow,

CalFed Bay Delta Program

From what I have read of your plan, it fails to do enough to promote the efficient use and conservation of our existing water supplies. We should do more to repair the damage caused by existing facilities before we embark upon the construction of new ones. We should remove barrier dams, increase instream flow, and acquire and restore fish and wildlife habitat. Building yet more dams is not the answer!

Yours very truly,

Mark Beasher
